

Workware ERP Suite

Tailored ERP solution for your business

Workware ERP Solution for Voss Exotech Automotive Pvt. Ltd.

Executive Summary

VOSS Exotech Automotive (VEAPL, Pune) is specialised in connection technology for compressed air brake systems and fuel systems in trucks and buses. Prior to implementation of WorksWare ERP System, the management was concerned about high inventory carrying cost and unorganized production management. After discussion with management, a multipronged strategy was implemented. After implementing the strategy, at the end of first year inventory carrying cost was reduced by 18% there by improving bottom line.

Challenges faced by Voss Exotech Automotive

Voss Exotech, going through a rapid growth path, found its existing systems obsolete to meet the growing business needs. Primary challenge areas identified were:

- Lack of Smoother and faster process flow
- Inefficient distribution of information
- lack of transparency and better control
- Insufficient Protection/ Security of data
- Lack of Sub-Contractor Traceability
- Improper Inventory management of raw materials
- Lack of Automatic integration of key business processes, such as sales, purchase, production, QC, accounts, excise, etc.

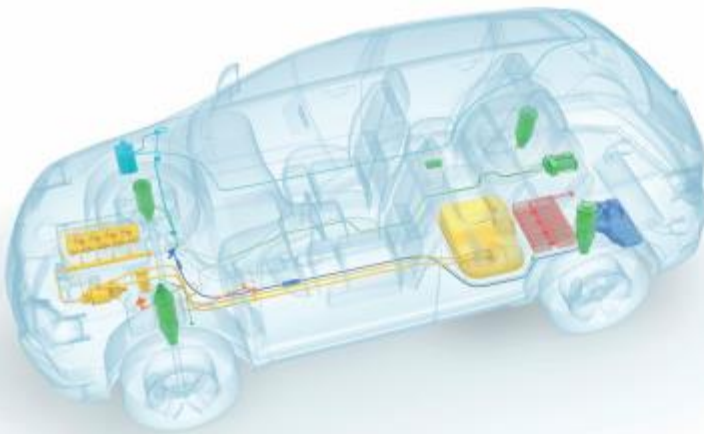

Solution offered to Voss Exotech Automotive

An Easy to Use ERP System with Strong Production Environment, Comprehensive Reporting, and Complete Visibility across the Entire Enterprise

Workware accommodates the needs of both small and large manufacturing, sales and distribution organizations and gives everyone in the company, complete control over their work area.

Key Benefits Achieved – Post Implementation

Efficiency Gains throughout the Organization Gives More Control and Positions Company for Long-term Growth

- Machine Master and Process Master are linked to Work order. The Production Planning module is linked to sales order and Bill of Material master. User is able to track stage-wise production.
- When the work order will be prepared then the user (from production section) will do the daily planning according to machines that are available to him and according to work order quantity and the process that has to be done.
- Select the work order number for which the planning is to be done.
- When you select the work order number, item code and work order quantity gets defaulted automatically. Then select machine name for the respective process that has to be done.
- In the process drop down the process defined in the work order which are required will get defaulted. The user has to select process one by one and then define its plan quantity and shift and click on add button.
- In Production entry, user can enter the time required for manufacturing a given item i.e. start time & end time.

About Atlantis

Atlantis Cloud ERP solutions is a Canada based ITEs company headquartered in Toronto, Canada with development centers in Michigan, USA and Pune, India.
